## JFrame - Gridbag Layout

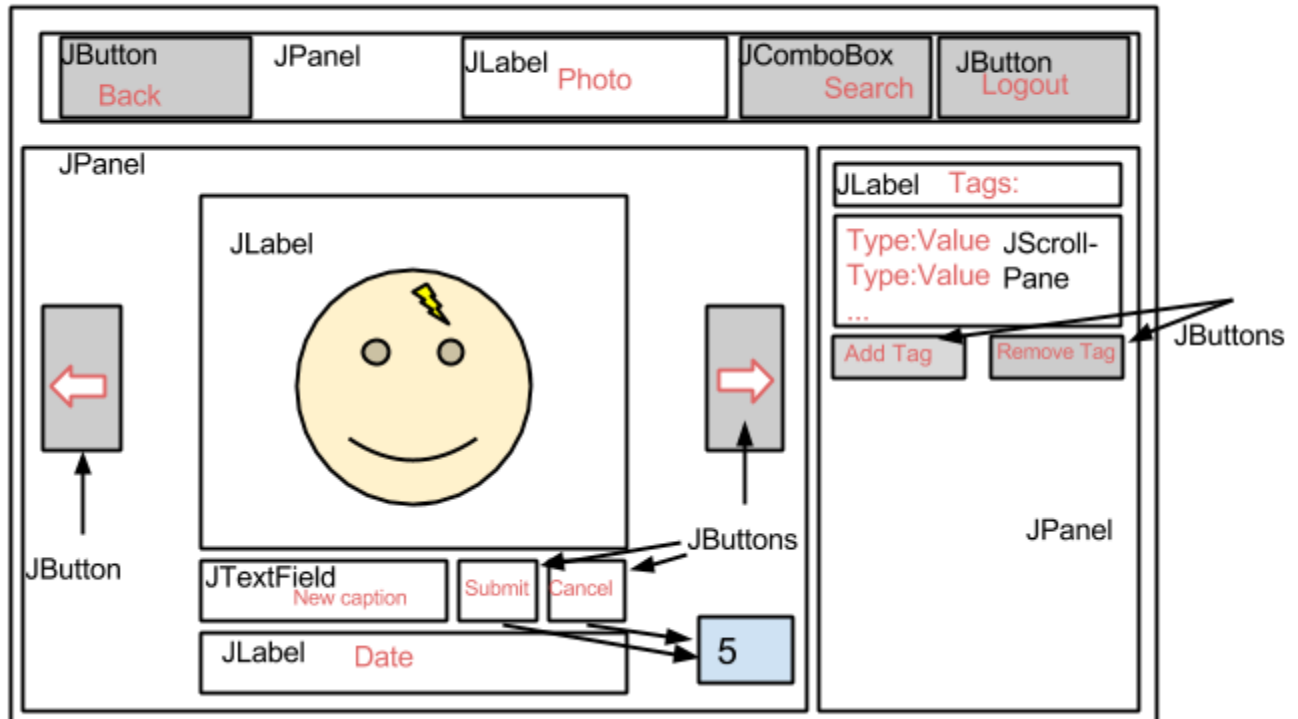

The diagram illustrates a Java Swing window titled "JPanel". The window is composed of several nested panels and components:

- Top Bar:** A horizontal bar containing five components: a `JButton` labeled "Back", a `JPanel` (empty), a `JLabel` labeled "Photo", a `JComboBox` labeled "Search", and a `JButton` labeled "Logout".
- Main Content Area:** A large `JPanel` containing:
  - A central `JLabel` displaying a yellow smiley face with a lightning bolt on its forehead.
  - Two `JButton` components (left and right arrows) flanking the central label.
  - A `JTextField` containing the text "5.2" and a `JLabel` labeled "Date" below it.
  - Two `JButtons` labeled "Submit" and "Cancel" to the right of the text field.
- Right Sidebar:** A `JPanel` containing:
  - A `JLabel` labeled "Tags:".
  - A `JScrollPane` containing two `Type:Value` entries and an ellipsis "...".
  - Two `JButtons` labeled "Add Tag" and "Remove Tag" below the scroll pane.

Arrows indicate the hierarchy and relationships between the components, showing how they are nested within their parent panels.
